

A modern, minimalist interior space featuring a large glass wall and ceiling. The floor is made of dark, polished stone tiles. In the background, there is a lounge area with dark sofas and a coffee table. The lighting is warm and ambient, highlighting the reflective surfaces of the glass and stainless steel.

Al Samah Teehoo Co., Ltd.

Lead the Trend
Beyond Your Expectations

One-stop solution.
Decorative stainless steel.
Saudi Arabia.

Company Overview

Al Samah Teehoo Co., Ltd is a joint venture between AL SAMAH Technical Factory — a Saudi Arabian pioneer with over 40 years of industry experience — and TEEHOO Stainless Steel from China, a 20+ year innovator in PVD decorative stainless steel. The company is strategically located in Riyadh's Sulay Industrial District, positioning it at the heart of the Kingdom's construction and development boom.

The company delivers a fully integrated, one-stop solution for decorative stainless steel, covering every stage from raw materials processing through to finished project installation. Services span cutting, grooving, bending, laser work, welding, polishing, Physical Vapor Deposition (PVD) coating, Nano Anti-Fingerprint treatment, and Antique surface finishing.

Anchored by a shared commitment to Quality, Service, and Efficiency, Al Samah Teehoo operates in direct support of Saudi Vision 2030, partnering with leading stakeholders across construction, interior decoration, design, kitchen, elevator, and furniture industries.

High End Customization, Selected Quality

Our Vision

To contribute a substantial future through continuous innovation coupled with lifecycle services — establishing Al Samah Teehoo as the region's foremost authority in decorative stainless steel.

Our Mission

To lead as the regional benchmark supplier in decorative and industrial stainless steel — educating the market, setting trends, and delivering results that consistently exceed client expectations.

Our Core Values

Integrity| Morality |Professionalism | Celerity| Persistence

"We did not enter Saudi Arabia to supply material. We came to build a decorative stainless steel industry — one that empowers Saudi architects to specify world-class finishes, locally manufactured, without compromise."

Forty years ago, AL SAMAH chose manufacturing as its discipline. Twenty years ago, TEEHOO chose decorative stainless steel as its frontier. Today, those two commitments converge in Riyadh — and our shared ambition is unmistakable: to lead the regional market in finish, capacity and architectural service.

Our investment in PVD coating, Nano Anti-Fingerprint and antique finishing is also an investment in Saudi talent, Saudi infrastructure and Saudi Vision 2030. Every cabinet polished, every panel coated, every elevator clad in our facility is a contribution to the Kingdom's industrial future.

To our clients, partners and team — thank you for trusting us to lead the trend. We intend to honor that trust, beyond your expectations.

CHAIRMAN OF THE BOARD · AL SAMAH TEEHOO CO., LTD

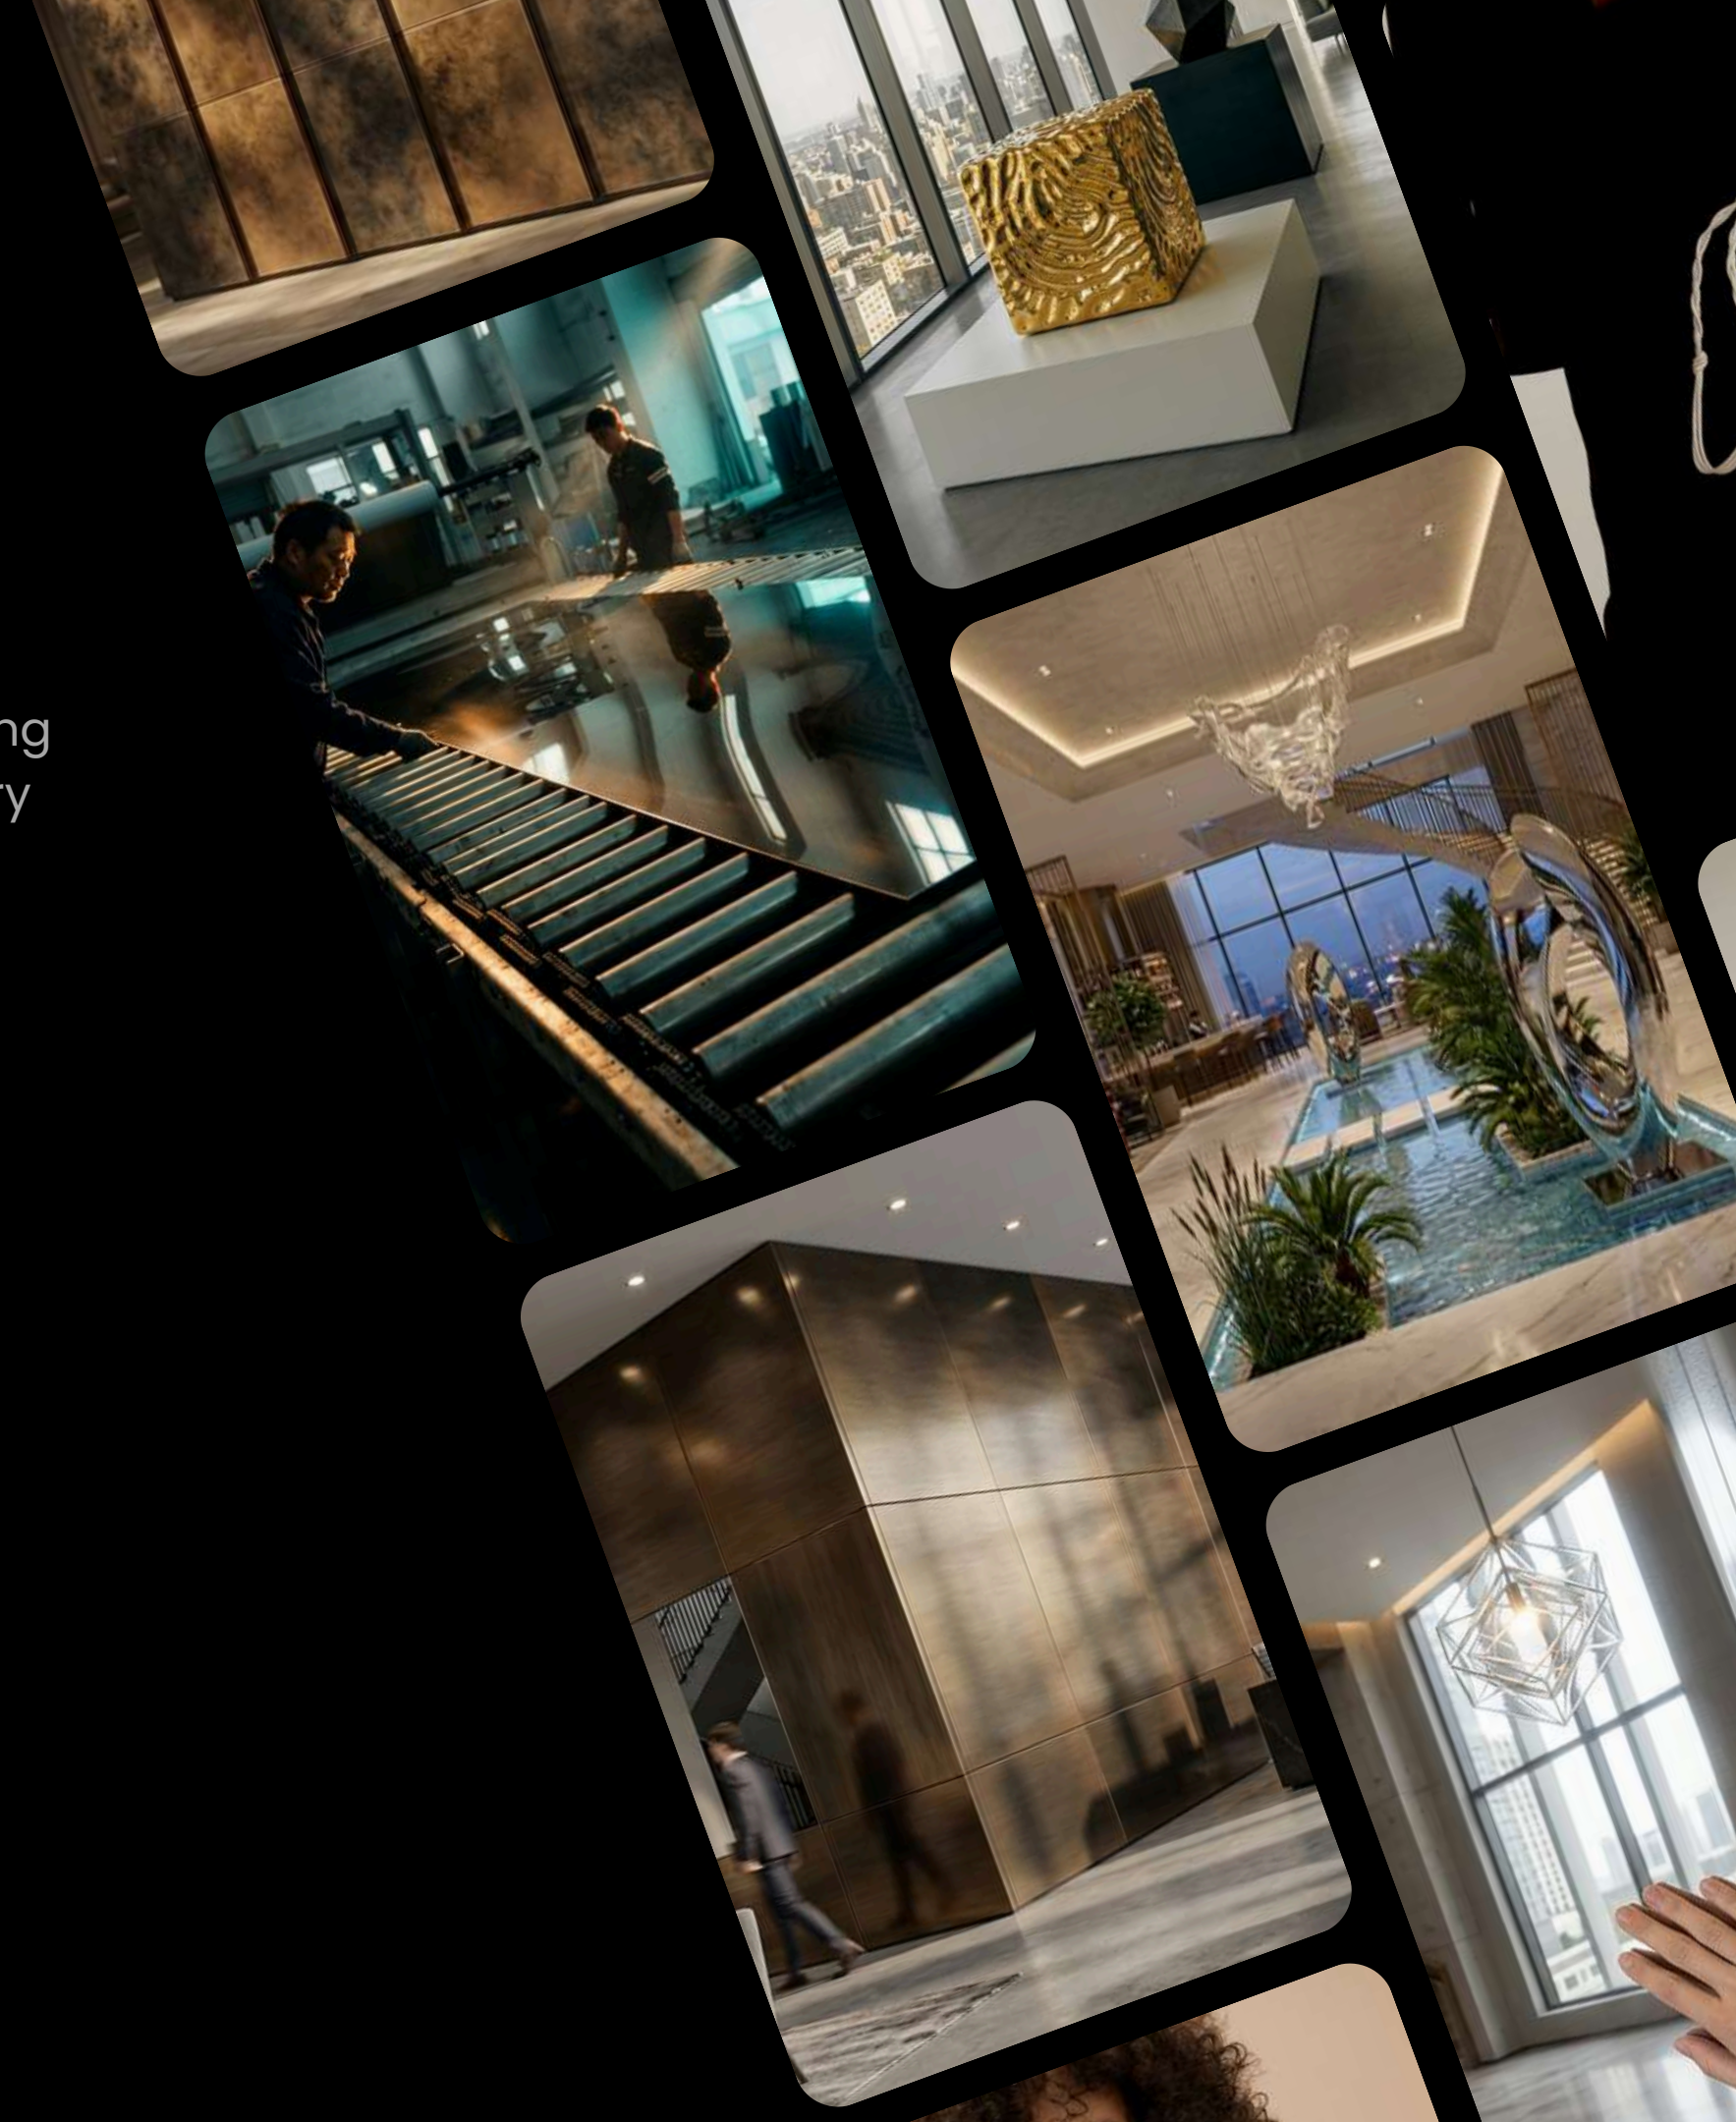

Products & Services

From raw sheet to finished surface
— every stage of decorative
stainless steel, in-house.

Complete Decorative Stainless Steel **Solutions.**

At the forefront of decorative stainless steel sheet processing, architectural metalwork, PVD coating, Nano Anti-Fingerprint technology and Antique finishing — Al Samah Teehoo delivers a complete one-stop solution for projects of every scale, on one invoice, by one accountable team.

- ◆ Sheet processing
- ◆ PVD decorative coating
- ◆ Antique finishing
- ◆ Architectural metalwork
- ◆ Nano Anti-Fingerprint
- ◆ Project installation

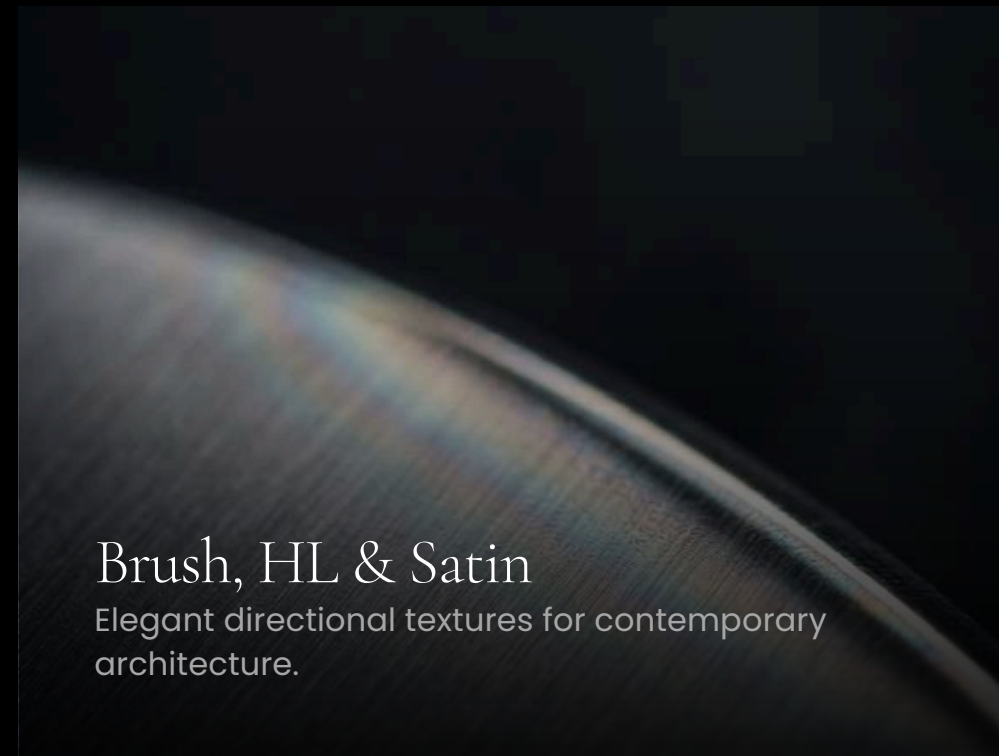

Six disciplines. *One roof.*

8K Mirror Process

Luxury decorative coatings with superior durability.

Brush, HL & Satin

Elegant directional textures for contemporary architecture.

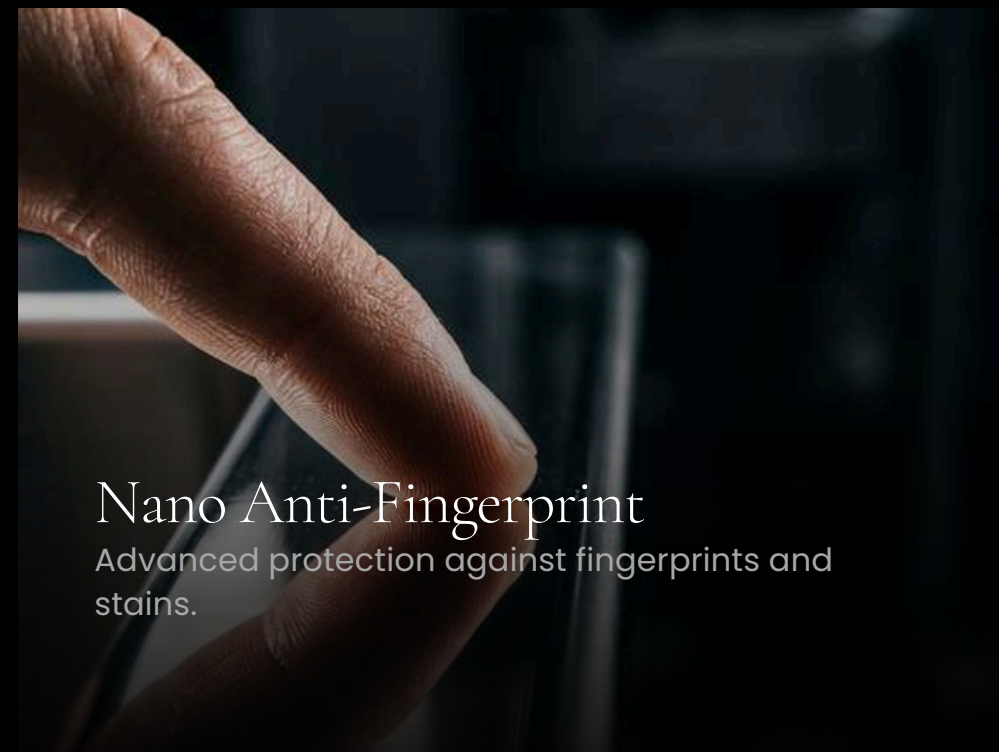

Fabrication & Projects

Custom fabrication, laser cutting, bending, welding, installation.

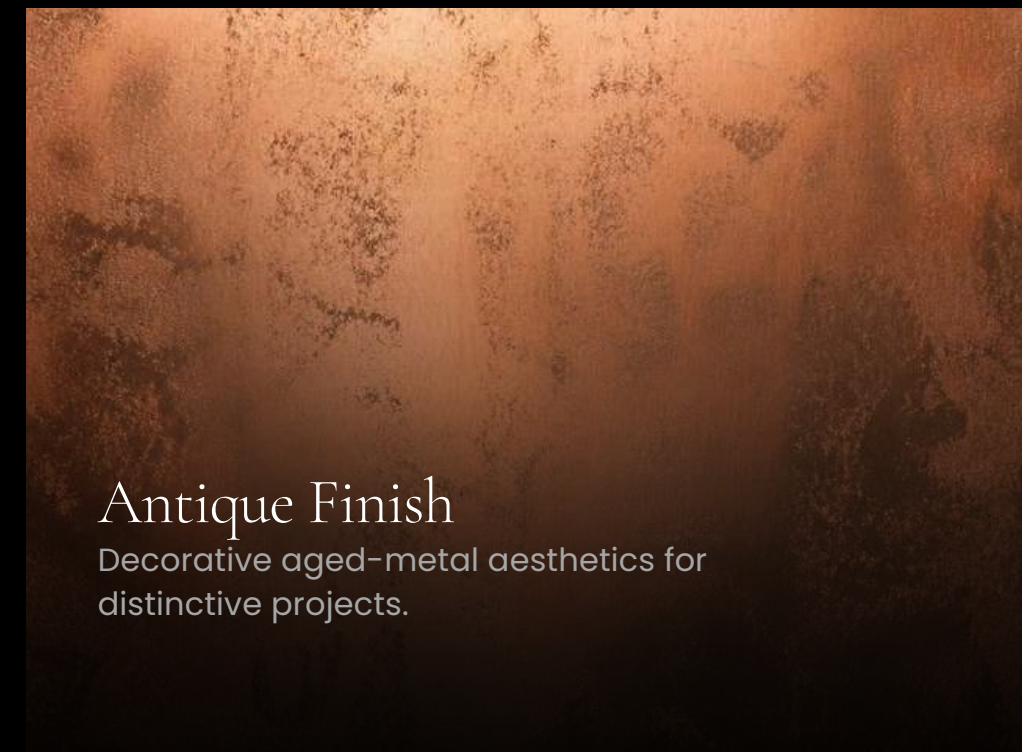

PVD Coating

Luxury decorative coatings with superior durability.

Nano Anti-Fingerprint

Advanced protection against fingerprints and stains.

Antique Finish

Decorative aged-metal aesthetics for distinctive projects.

8K Mirror Process

Reflective. Flawless.
An eye-catcher in every project.

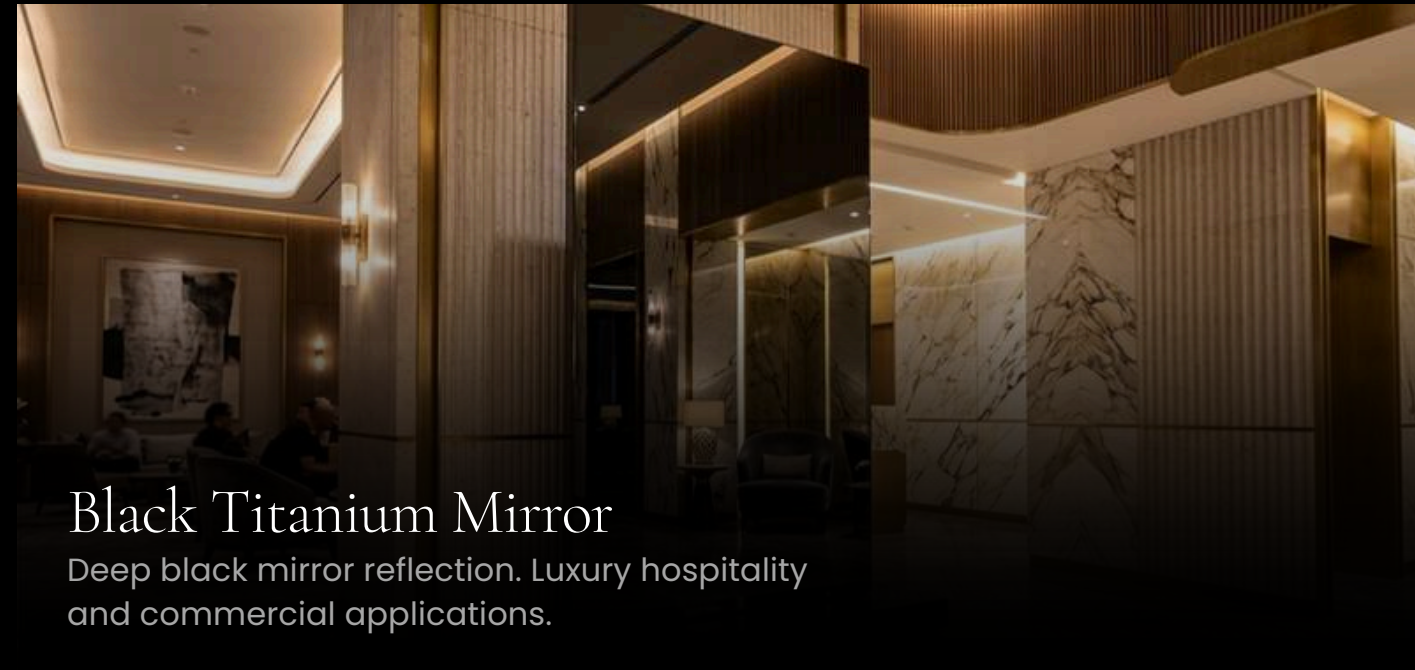

The Ultimate Mirror Finish

Our advanced mirror polishing process combines precision grinding, premium polishing compounds, advanced polishing heads and a water cyclic cooling system to achieve super-reflective 8K, 10K and 12K mirror finishes — engineered for architectural-grade performance.

REFLECTIVITY

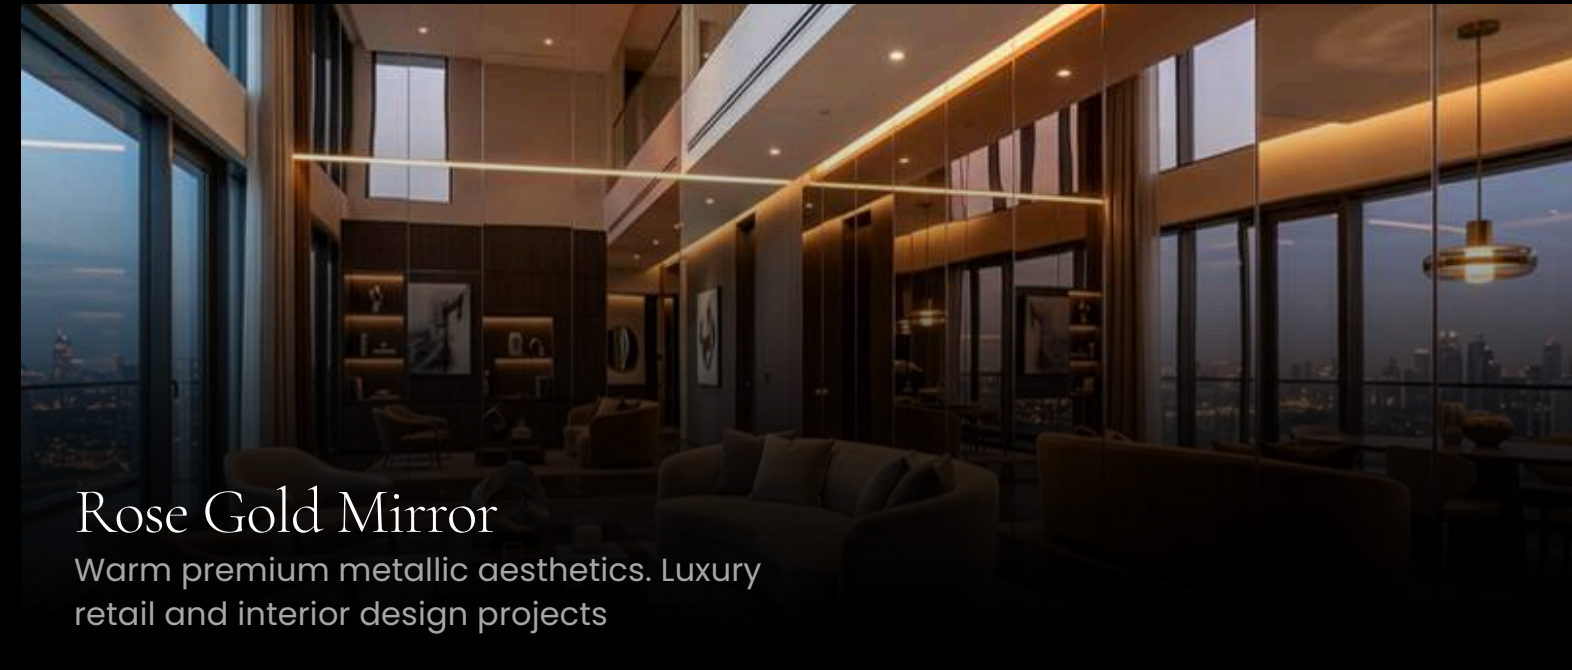

8K · 10K · 12K

Four signature finishes. *Architect-curated.*

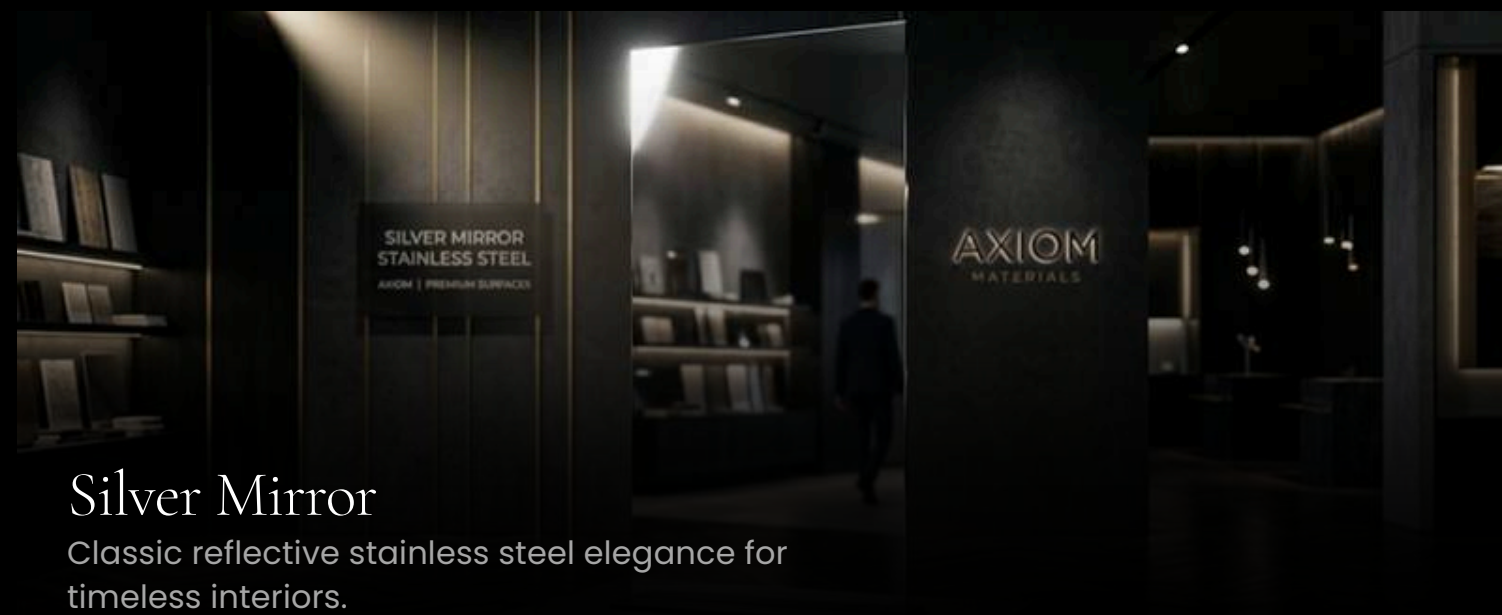

Black Titanium Mirror

Deep black mirror reflection. Luxury hospitality and commercial applications.

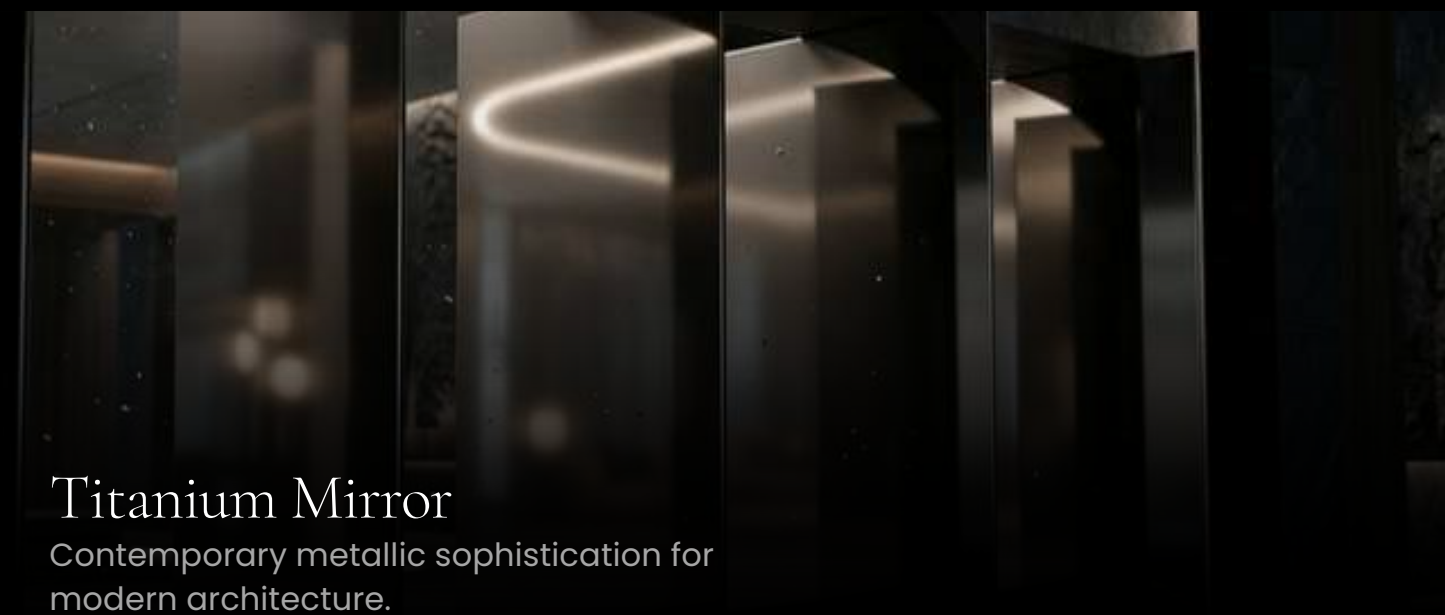

Rose Gold Mirror

Warm premium metallic aesthetics. Luxury retail and interior design projects

Silver Mirror

Classic reflective stainless steel elegance for timeless interiors.

Titanium Mirror

Contemporary metallic sophistication for modern architecture.

Specifier-ready data sheet.

AVAILABLE GRADES

SUS 201 · 304 · 316 · 316L

THICKNESS OPTIONS

SUS 201 · 304 · 316 · 316L

CUSTOMIZATION

CUT-TO-SIZE · EMBOSSING · PVD OVERLAY

INDOOR APPLICATIONS

LOBBIES · ELEVATORS · RETAIL · CEILINGS

SHEET SIZES

1219 × 2438 · 1219 × 3048 · 1500 × 3000 MM

FINISH OPTIONS

8K · 10K · 12K MIRROR

FABRICATION COMPATIBILITY

LASER CUTTING · BENDING · WELDING · CNC

OUTDOOR APPLICATIONS

FAÇADES · SIGNAGE (WITH PVD TOP-COAT)

Brush, HL & Satin Process

Textured finishes
built for durability and design.

Precision-engineered surface textures
combining visual sophistication, durability and
architectural versatility for modern projects.

Where texture meets performance

Stainless steel sanding is a precision surface treatment that creates distinctive textures through controlled physical friction — enhancing both the visual appearance and the performance characteristics of stainless steel for architectural, commercial, industrial and decorative applications.

SURFACE TEXTURES

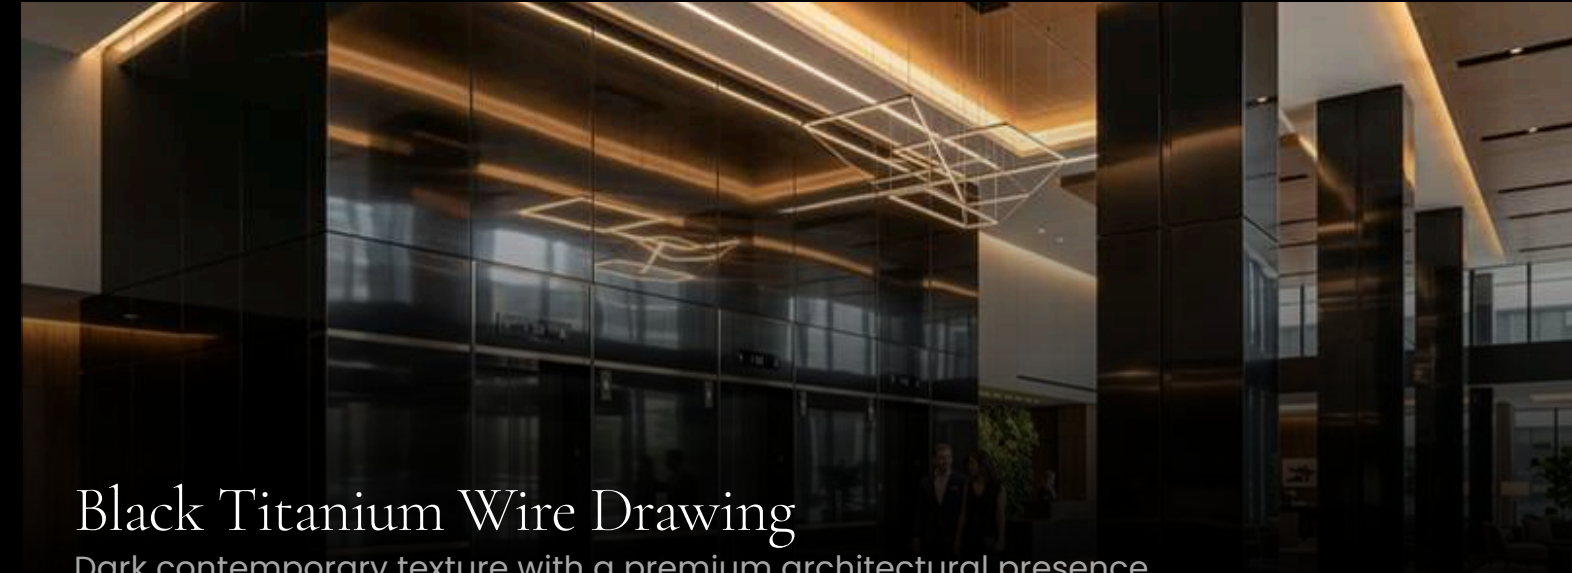

BRUSH · HL · N₄

Four signature finishes. wire-drawn finishes.

Red Antique Copper Wire Drawing

Rich copper tones with an elegant directional texture. Luxury restaurants, boutique hotels and decorative feature walls.

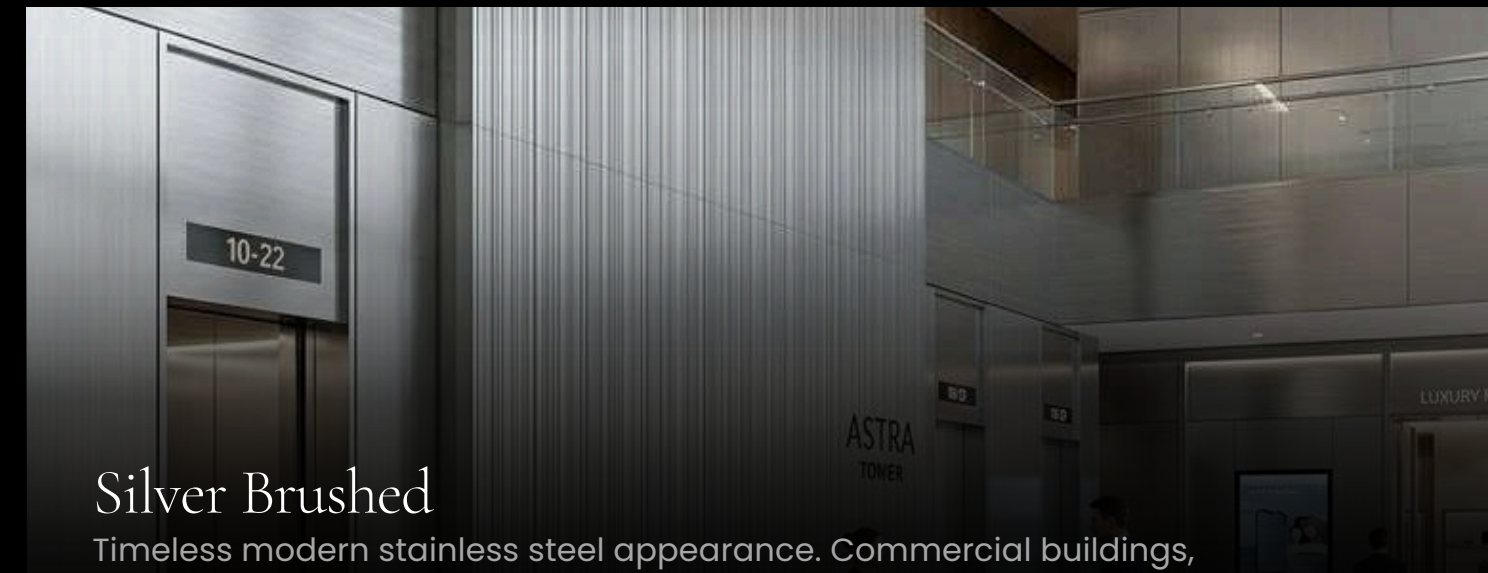

Black Titanium Wire Drawing

Dark contemporary texture with a premium architectural presence. Corporate reception, elevator interiors and luxury retail.

Green Antique Copper Wire Drawing

Heritage-inspired finish combining warmth and character. Decorative panels, boutique interiors and artistic installations.

Silver Brushed

Timeless modern stainless steel appearance. Commercial buildings, hotel lobbies and elevator panels.

Specifier-ready data sheet.

Fabrication & Projects

From equipment to finished architectural pieces.

Transforming premium stainless steel into architectural solutions through advanced fabrication technology, skilled craftsmanship and precision engineering.

Where design meets manufacturing excellence.

Our advanced fabrication facility combines cutting-edge equipment, skilled technicians and decades of experience to transform raw stainless steel into high-quality architectural and industrial products.

From precision cutting and bending to welding and custom manufacturing, every process is engineered to deliver exceptional quality, consistency and project efficiency.

SURFACE TEXTURES

BRUSH · HL · N₄

Four signature finishes.
wire-drawn finishes.

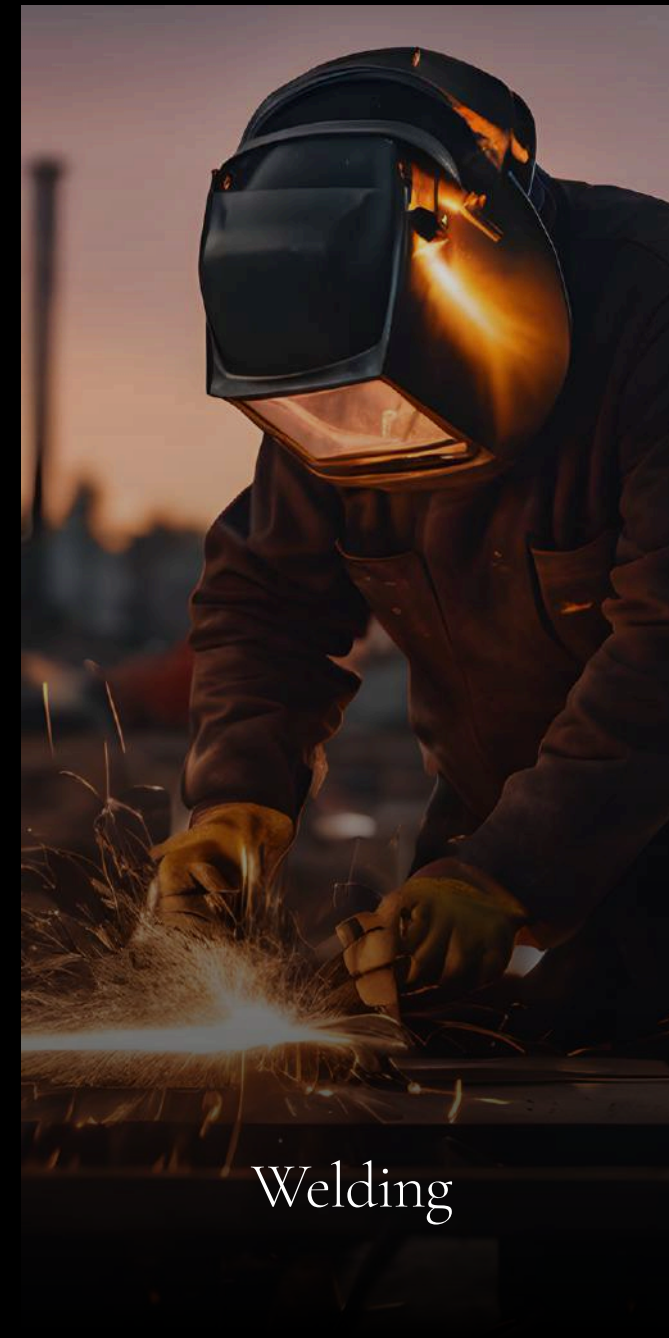

Shearing & Cutting

Press Braking &
Bending

Laser Cutting

Welding

CNC Processing

PVD Coating

Durable. Precise.
Versatile.

An advanced surface science.

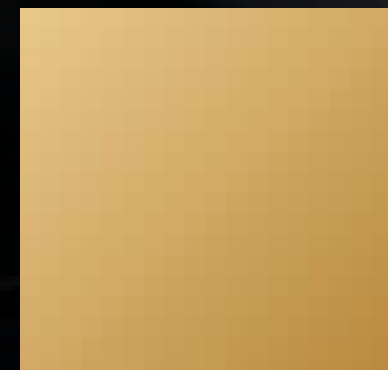

Physical Vapor Deposition is a precision vacuum coating process that bonds ultra-thin metallic layers directly onto stainless steel — producing architectural surfaces that are harder, more resistant and visually richer than traditional plating could ever achieve.

PROCESS
VACUUM
DEPOSITION

A full spectrum of finishes.

From signature metallics to bespoke architectural colorways — every PVD finish is engineered to deliver the same durability, color stability and uniform film thickness across projects of any scale.

Nano Anti Fingerprint.

Cleaner surfaces.
Lower maintenance.
Lasting beauty.

A nano-level defense layer.

Our stainless steel nano anti-fingerprint machine applies a nano-level anti-fingerprint coating to the surface of stainless steel. This technology significantly reduces the adhesion of fingerprints and stains — improving both the beauty of the product and the convenience of cleaning and maintenance.

A variety of anti-fingerprint (AFP) coating technologies are capable of functionalizing numerous substrate types with anti-fingerprint properties. AFP coatings and treatments significantly increase the hiding power and ease of cleaning of various substrates, including metal with roughening or texture.

Antique Finish

Timeless character Precise.
for modern decoration.

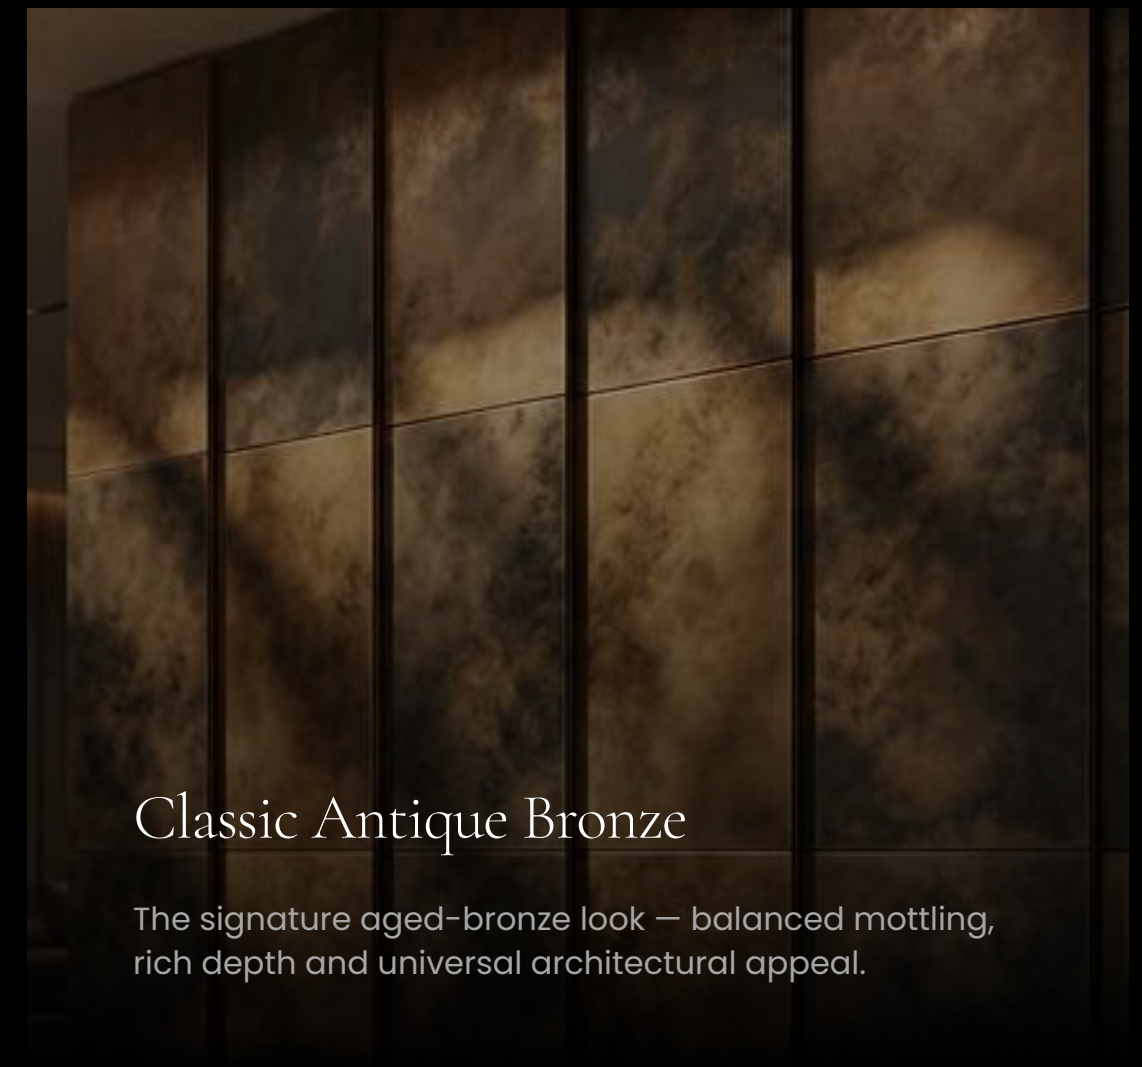

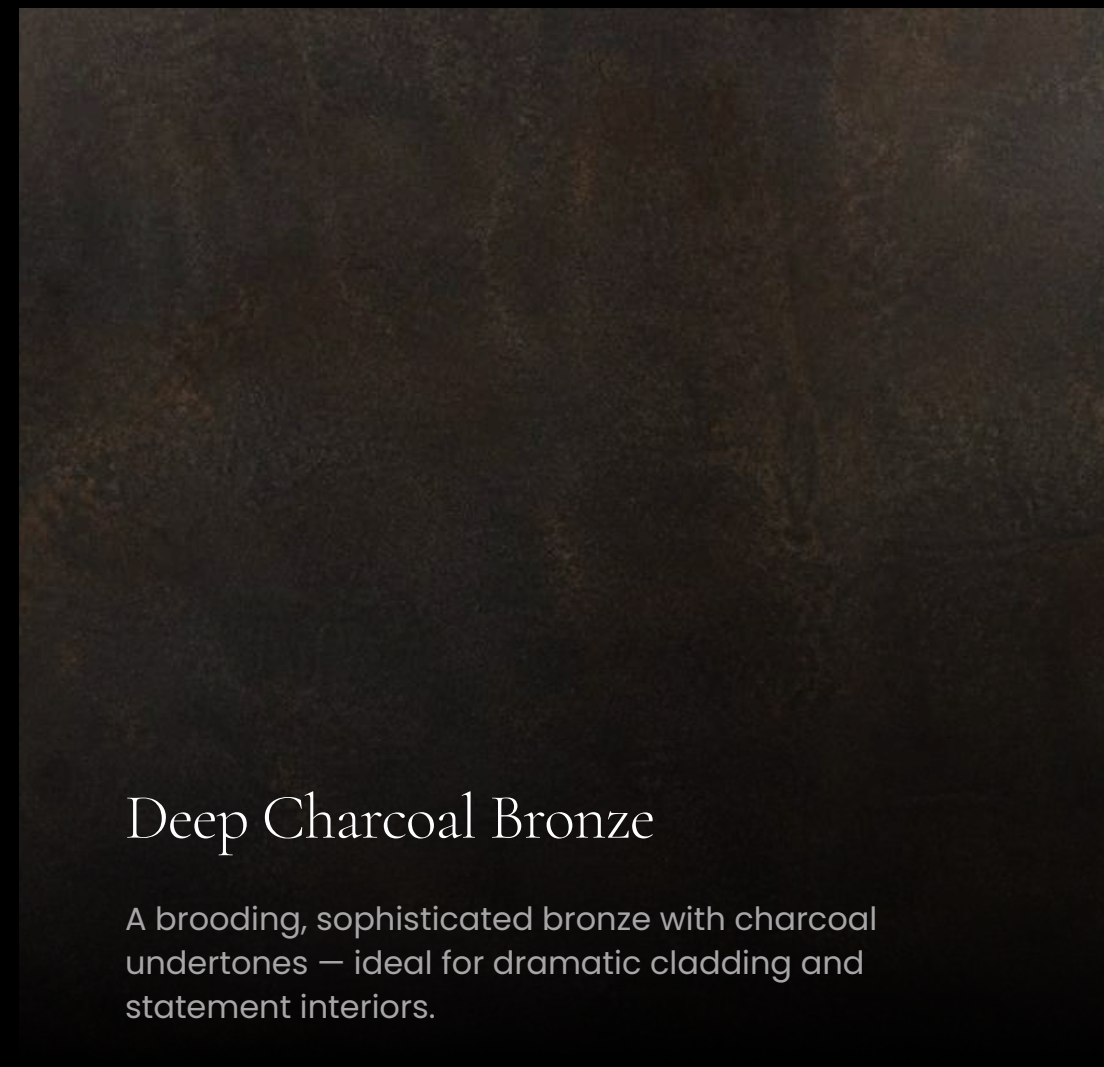

Warmth, depth, and a sense of heritage.

Antique bronze aging is a surface treatment process that gives copper or copper-alloy surfaces a color and texture similar to antique bronze. This effect is particularly popular in the field of interior and architectural decoration, adding warmth, depth, and a sense of heritage to modern spaces.

PROCESS BRONZE AGING

From rose copper to deep charcoal bronze.

Available in a range of tones — from rose copper to deep charcoal bronze — for cladding, panels, hexagonal tiles and decorative trim.

Design & Applications

Beyond processing and supply, Al Samah Teehoo operates a full Original Design Manufacturing (ODM) capability, providing complete design-to-installation solutions for complex architectural and interior projects. The company's design team works closely with clients, architects, and interior designers to develop unique, site-specific stainless steel concepts — from initial sketches to detailed engineering drawings and final fabricated components.

Design services are guided by Italian quality standards, ensuring that every solution combines aesthetic refinement with structural integrity. The one-stop model means clients benefit from a single point of accountability across the entire project lifecycle.

Interior Decoration

Feature walls, ceiling panels, decorative screens, partition systems, wall cladding, and bespoke art installations for private residences, villas, palaces, and premium commercial interiors.

Real Estate Sales Centres

Grand reception halls, model-apartment showrooms, and marketing centre fit-outs where first impressions must communicate quality and ambition — executed in decorative stainless steel elements that project confidence and luxury.

Elevator Spaces

Complete elevator cab interiors including wall panels, ceiling systems, handrails, floor trims, and door surrounds – finished to mirror, brushed, or PVD specifications for maximum durability and visual impact.

Hotel Lobbies

Statement entryways and reception areas featuring large-format decorative screens, backlit feature walls, sculptural installations, column cladding, and bespoke lighting integration — all using Al Samah Teehoo's full range of surface finishes.

Display Stands & Retail Environments

Statement entryways and reception areas featuring large-format decorative screens, backlit feature walls, sculptural installations, column cladding, and bespoke lighting integration — all using Al Samah Teehoo's full range of surface finishes.

Coffee Shops & Restaurants

Decorative ceiling grilles, bar fronts, back-bar shelving, architectural screens, and furniture bases crafted in antique copper or brushed gold finishes that create warm, inviting atmospheres.

Shopping Malls

Atrium feature installations, escalator balustrades, directory signage structures, ceiling soffit panels, and column cladding systems designed to handle high-footfall environments while maintaining premium appearance.

Luxury Retail Shops

Full fit-out capability for fashion, jewellery, and accessory boutiques – including bespoke display systems, illuminated shelving, fitting room metalwork, and sculptural focal pieces finished in PVD gold or black titanium.

Why Al Samah Teehoo?

- 60+ Combined Years of Expertise — **AL SAMAH's** 40+ years in Saudi Arabia plus **TEEHOO's** 20+ years in PVD innovation provide unmatched technical depth.
- Truly One-Stop — Design, processing, fabrication, PVD coating, AFP, Antique finish, and project installation all under a single contract and single roof in Riyadh.
- Saudi Arabia's First Decorative Stainless Steel Manufacturer — Pioneer status in the local market, with no comparable vertically integrated domestic competitor.
- **Italian Quality** Standards — All finished products are benchmarked against internationally recognised European standards.
- **100%** ODM Capability — Fully bespoke designs developed for individual client projects, with no minimum design fee.
- Locally Manufactured in Riyadh — Shorter lead times, lower logistics costs, and direct access to the GCC's largest construction market.
- **Saudi Vision 2030** Alignment — Actively contributing to localisation (Saudization) and industrial development goals.
- Strategic Partner Network — Established relationships across construction, decoration, design, kitchen, elevator, and furniture sectors.

Sustainability & Vision 2030 Commitment

Al Samah Teehoo is actively aligned with the goals of Saudi Vision 2030, contributing to industrial localisation, employment of Saudi nationals, and the development of high-value manufacturing capability within the Kingdom.

Environmental responsibility is embedded in the company's process selection. PVD coating, as a core technology, significantly reduces the use of hazardous chemicals compared to traditional wet electroplating. Water-recycling systems on polishing lines minimise consumption, and ongoing investment in process efficiency reduces energy use per unit of output.

The company is committed to growing its Saudi workforce through on-the-job training and skills transfer from its experienced Chinese technical team, building long-term local capability in a high-value manufacturing discipline.
